Personal Roadmap for Rahul Sharma

Data Analyst

A 12-week plan from Excel basics to your first data analyst role — Python, SQL, Power BI, and two portfolio projects.

💰 **Expected: ₹35,000 – ₹60,000/month**

📅 Week-by-week plan

Week 1: Excel & Data Foundations

Goals:
• Learn VLOOKUP, PivotTables, INDEX-MATCH
• Clean a messy CSV: remove duplicates, fix date formats
• Understand structured vs unstructured data

🔗 https://www.freecodecamp.org/
🔗 https://www.coursera.org/

🛠 **Practice:** Analyse last month sales: find top 3 products and plot the trend.

Week 2: SQL Basics

Goals:
• Install PostgreSQL; connect with DBeaver
• Write SELECT, WHERE, GROUP BY, JOIN queries
• Solve 20 HackerRank SQL Easy problems

🔗 https://nptel.ac.in/

🛠 **Practice:** Query a sample e-commerce DB: highest-revenue city per month.

Week 3: Python + Pandas

Goals:
• Install Anaconda; open Jupyter Notebook
• Load CSV into Pandas, clean nulls, compute summary stats
• Group-by and pivot operations

🔗 https://www.coursera.org/professional-certificates/google-data-analytics

🛠 **Practice:** Reproduce your Week 1 Excel analysis in Python.

Week 4: Data Visualisation + Power BI

Goals:
• Matplotlib: line, bar, scatter charts
• Import data into Power BI Desktop; build 3 visuals
• Publish to Power BI Service (free tier)

🔗 https://learn.microsoft.com/en-us/certifications/power-bi-data-analyst-associate/

🛠 **Practice:** Dashboard: 5 KPIs from Kaggle Superstore dataset, exported as PDF.

Week 5: Statistics for Analysts

Goals:
• Mean, median, std dev — when to use each
• Normal distribution and z-scores
• Correlation vs causation: 3 real examples

🛠 **Practice:** Find outliers in a sales dataset; write a 1-page hypothesis.

Week 6: Advanced SQL + Window Functions

Goals:
• RANK(), LAG(), LEAD() with PARTITION BY
• CTEs and subqueries for multi-step analysis
• Solve 10 HackerRank Medium SQL problems

🛠 **Practice:** Cohort analysis: which acquisition month retains users best?

Week 7: Portfolio Project 1

Goals:
• Pick a Kaggle dataset (HR, e-commerce, or finance)
• Full EDA notebook: 8+ charts, 1 key insight per section
• Push to GitHub with a clear README

🔗 https://internshala.com/

🛠 **Practice:** Share the notebook on LinkedIn; collect 5 comments.

Week 8: Data Storytelling

Goals:
• Context → finding → recommendation structure
• Declutter a chart; choose the right chart type
• Build a 5-slide deck from your Week 7 project

🛠 **Practice:** Present the deck out loud, record yourself, watch it back.

Week 9: Real-World Data Pipeline

Goals:
• Pull data from a public API (weather or GitHub Events)
• Store in PostgreSQL; schedule a daily refresh
• Connect Power BI to the live database

🔗 https://www.skillindiadigital.gov.in/home

🛠 **Practice:** Automate a daily report email with Python smtplib.

Week 10: Interview Prep

Goals:
• 100 most common SQL interview questions
• 3 Pandas coding challenges from LeetCode
• STAR story for 'Tell me about a data project'

🛠 **Practice:** Mock interview: 30 min SQL + 15 min behavioural with a friend.

Week 11: Resume & LinkedIn

Goals:
• Resume: 1 page, 3 bullet points per project, numbers everywhere
• LinkedIn: 'Data Analyst | Python · SQL · Power BI'
• Connect with 20 data analysts in your city this week

🔗 https://www.linkedin.com/jobs/
🔗 https://www.naukri.com/

🛠 **Practice:** Apply to 5 junior DA roles on Naukri and Internshala.

Week 12: Final Project + Launch

Goals:

• End-to-end project: question → SQL → Python → Power BI dashboard
• Deploy publicly via Power BI Service link
• 15 personalised applications with a custom opening line

🔗 https://www.upwork.com/

🛠 **Practice:** Goal: 1 interview call booked before end of week.
