

Personal Roadmap for Akkyy

Career path: Junior Web Developer (Frontend)

Akkyy, you are in your final year of BCA with a strong interest in coding. This 20-week roadmap will take you from foundational HTML/CSS to building real React projects and landing your first remote or local web development job in Jaunpur or online. You will build a portfolio, contribute to GitHub, and apply for entry-level roles or freelance gigs targeting ₹15,000–₹25,000/month within 6–12 months.

Duration: 20 weeks • Expected salary: ₹15,000–₹25,000/month

Week-by-week plan

Week 1: HTML Fundamentals & Dev Environment Setup

Goals:

- Set up VS Code and Chrome DevTools on your computer
- Understand HTML structure, tags, forms, and semantic elements

Resources:

→ HTML Tutorial for Beginners in Hindi – CodeWithHarry (youtube) — <https://www.youtube.com/watch?v=BsDoLVMnmZs>

→ Web Development Course – Skill India Digital (skillIndia) — <https://www.skillindia.gov.in/>

Practice: Build a static personal profile page using only HTML with your name, education, and interests

Week 2: CSS Basics — Styling and Layouts

Goals:

- Learn CSS selectors, box model, colors, and typography
- Apply basic styles to last week's HTML profile page

Resources:

→ CSS Tutorial for Beginners – CodeWithHarry (youtube) — https://www.youtube.com/watch?v=Edsxf_NBFrw

→ CSS Crash Course For Absolute Beginners – Traversy Media (youtube) — <https://www.youtube.com/watch?v=yfoY53QXEnI>

Practice: Style your personal profile page with CSS: add colors, fonts, spacing, and a profile picture placeholder

Week 3: CSS Flexbox & Responsive Design

Goals:

- Master Flexbox for creating flexible layouts
- Make web pages responsive using media queries

Resources:

→ Flexbox CSS in 20 Minutes – Traversy Media (youtube) — <https://www.youtube.com/watch?v=JJSoEo8JSnc>

→ Responsive Web Design – freeCodeCamp (free audit) (other) — <https://www.freecodecamp.org/learn/2022/>

responsive-web-design/

Practice: Rebuild your profile page to be fully responsive — it should look good on both mobile and desktop

Week 4: CSS Grid & Building Real Page Layouts

Goals:

- Understand CSS Grid and when to use it vs Flexbox
- Clone a simple landing page layout from a real website

Resources:

→ CSS Grid Tutorial – Kevin Powell (youtube) — <https://www.youtube.com/watch?v=9zBsdzdE4sM>

→ Build a Responsive Website – Traversy Media (youtube) — <https://www.youtube.com/watch?v=p0bGHP-PXD4>

Practice: Clone the layout of any simple local business or news website front page using HTML and CSS only

Week 5: JavaScript Fundamentals — Part 1

Goals:

- Learn variables, data types, operators, and control flow in JavaScript
- Understand functions and how to use the browser console

Resources:

→ JavaScript Tutorial for Beginners – CodeWithHarry (youtube) — <https://www.youtube.com/watch?v=ER9SspLe4Hg>

→ JavaScript Algorithms and Data Structures – freeCodeCamp (other) — <https://www.freecodecamp.org/learn/javascript-algorithms-and-data-structures/>

Practice: Write a JavaScript quiz app in the browser console — 5 questions with score tracking using if/else and functions

Week 6: JavaScript Fundamentals — Part 2 (DOM Manipulation)

Goals:

- Learn how to select and manipulate HTML elements using JavaScript DOM
- Understand events, event listeners, and dynamic content updates

Resources:

→ JavaScript DOM Tutorial – CodeWithHarry (youtube) — <https://www.youtube.com/watch?v=tdnTDMQPn4s>

→ JavaScript DOM Crash Course – Traversy Media (youtube) — <https://www.youtube.com/watch?v=0ik6X4DJKCc>

Practice: Build an interactive to-do list app using HTML, CSS, and vanilla JavaScript with add and delete functionality

Week 7: JavaScript ES6+ Modern Features

Goals:

- Learn arrow functions, template literals, destructuring, and spread operator
- Understand array methods like map, filter, and reduce

Resources:

- JavaScript ES6 Tutorial – CodeWithHarry (youtube) — https://www.youtube.com/watch?v=NCwa_xi0Uuc
- ES6 JavaScript Tutorial – Fun Fun Function (youtube) — <https://www.youtube.com/watch?v=6sQDTgOqh-I>

Practice: Refactor your to-do list app from Week 6 using ES6+ features: arrow functions, template literals, and array methods

Week 8: Git, GitHub & Version Control

Goals:

- Set up a GitHub account and learn Git basics (init, add, commit, push)
- Understand branches and how to collaborate on GitHub

Resources:

- Git and GitHub Tutorial for Beginners – CodeWithHarry (youtube) — <https://www.youtube.com/watch?v=gwWKnnCMQ5c>
- Git Tutorial for Beginners – Traversy Media (youtube) — https://www.youtube.com/watch?v=SWYqp7iY_Tc

Practice: Create a GitHub profile, push all your previous projects (profile page, clone, to-do app) to separate public repositories

Week 9: Introduction to React.js

Goals:

- Understand what React is and why it is used in modern web development
- Set up a React project using Create React App and understand JSX

Resources:

- React JS Tutorial for Beginners – CodeWithHarry (youtube) — <https://www.youtube.com/watch?v=RGKi6LSPDLU>
- React Crash Course – Traversy Media (youtube) — <https://www.youtube.com/watch?v=w7ejDZ8SWv8>

Practice: Create a React app that displays a list of 5 YouTube channels you follow with their name, category, and a description

Week 10: React Components, Props & State

Goals:

- Build and reuse functional components with props
- Understand useState hook and manage component state effectively

Resources:

- React Hooks Tutorial – Codevolution (youtube) — https://www.youtube.com/watch?v=cF2lQ_gZeA8
- React JS Full Course – Hitesh Choudhary (youtube) — <https://www.youtube.com/watch?v=vz1RIUyrc3w>

Practice: Build a weather card UI in React with mock data, where clicking a city updates the displayed weather using useState

Week 11: React useEffect & Fetching Data from APIs

Goals:

- Understand the useEffect hook and component lifecycle
- Fetch real data from a public API and display it in React

Resources:

- useEffect Hook Tutorial – Codevolution (youtube) — <https://www.youtube.com/watch?v=0ZJgIjIuY7U>
- Fetch API Introduction – Traversy Media (youtube) — <https://www.youtube.com/watch?v=Oive66jrwBs>

Practice: Build a GitHub profile finder app in React that fetches and displays a user's repositories from the GitHub public API

Week 12: React Router & Multi-Page Applications

Goals:

- Set up React Router and create a multi-page React application
- Implement navigation between Home, About, and Projects pages

Resources:

- React Router Tutorial – Web Dev Simplified (youtube) — <https://www.youtube.com/watch?v=UI3y1LXzdzU>
- React Router v6 Crash Course – Traversy Media (youtube) — <https://www.youtube.com/watch?v=59IXY5IDrBA>

Practice: Convert your GitHub profile finder app into a multi-page app with a Home page, Search page, and About page using React Router

Week 13: Tailwind CSS for Rapid UI Development

Goals:

- Install and configure Tailwind CSS in a React project
- Build clean, professional-looking UI components using Tailwind utility classes

Resources:

- Tailwind CSS Tutorial – CodeWithHarry (youtube) — https://www.youtube.com/watch?v=_9mTJ84uL1Q
- Tailwind CSS Crash Course – Traversy Media (youtube) — <https://www.youtube.com/watch?v=dFgzHOX84xQ>

Practice: Redesign your GitHub profile finder app UI using Tailwind CSS — make it look clean and professional

Week 14: Portfolio Project 1 — Personal Developer Portfolio Website

Goals:

- Plan and design a multi-section portfolio website with React and Tailwind
- Include sections: Hero, About, Skills, Projects, and Contact

Resources:

- Portfolio Website using React – JavaScript Mastery (youtube) — <https://www.youtube.com/watch?v=G-Cr00UYokU>
- React Portfolio Website Tutorial – Brian Design (youtube) — <https://www.youtube.com/watch?v=nogu4BHYzu0>

Practice: Build and deploy the Hero and About sections of your portfolio with your real name, photo, education, and introduction

Week 15: Portfolio Project 1 — Complete & Deploy Portfolio

Goals:

- Complete all portfolio sections including Projects and Contact form
- Deploy the portfolio live using GitHub Pages or Vercel for free

Resources:

- How to Deploy React App to Vercel - Traversy Media (youtube) — <https://www.youtube.com/watch?v=dn0HrJqbMvk>
- GitHub Pages Deployment - The Net Ninja (youtube) — <https://www.youtube.com/watch?v=SKXkC4SqtRk>

Practice: Publish your complete portfolio at a live URL (e.g. akky.vercel.app) and share the link on LinkedIn and GitHub

Week 16: Portfolio Project 2 — Full-Stack-Style CRUD App with LocalStorage**Goals:**

- Build a CRUD (Create, Read, Update, Delete) application in React
- Persist data using localStorage so it survives page refresh

Resources:

- React CRUD App Tutorial - PedroTech (youtube) — <https://www.youtube.com/watch?v=T2Y3PsJKJbk>
- LocalStorage in React - Web Dev Simplified (youtube) — <https://www.youtube.com/watch?v=AUOzvFzdIk4>

Practice: Build a Notes Manager app in React with full CRUD operations, search functionality, and localStorage persistence

Week 17: Introduction to Node.js & Express (Backend Basics)**Goals:**

- Understand what a backend server does and set up Node.js with Express
- Create simple REST API endpoints that return JSON data

Resources:

- Node.js and Express Tutorial - CodeWithHarry (youtube) — <https://www.youtube.com/watch?v=BLI32FvcdVM>
- Express JS Crash Course - Traversy Media (youtube) — <https://www.youtube.com/watch?v=L72fhGm1tfE>

Practice: Create a simple Express API with GET and POST routes for a student contact list and test it using a browser or Postman

Week 18: Job Readiness — Resume, LinkedIn & Freelance Profiles**Goals:**

- Build a clean, ATS-friendly developer resume highlighting BCA education and projects
- Set up professional LinkedIn and Internshala profiles targeting web developer roles

Resources:

- How to Make Developer Resume - Apna College (youtube) — <https://www.youtube.com/watch?v=iEoSQU0afAs>
- How to Get Internship on Internshala - Internshala (youtube) — <https://www.youtube.com/watch?v=kEcfpXAaGJU>

Practice: Publish your updated resume on LinkedIn, apply to 5 web developer internships on Internshala, and set up a Fiverr gig for basic website building

Week 19: Interview Preparation — DSA & Coding Rounds

Goals:

- Practice common frontend interview questions on HTML, CSS, and JavaScript
- Solve 15 easy-level coding problems on LeetCode or HackerRank

Resources:

- Top 50 JavaScript Interview Questions – Akshay Saini (youtube) — <https://www.youtube.com/watch?v=pN6jk0uUrD8>
- DSA for Beginners – Apna College (youtube) — <https://www.youtube.com/watch?v=z9bZufPHFLU>

Practice: Complete a mock interview: answer 10 HTML/CSS/JS questions out loud and solve 5 array problems on LeetCode Easy

Week 20: Final Project, Freelance Launch & Career Action Plan

Goals:

- Polish all GitHub repositories and ensure your portfolio showcases at least 4 projects
- Set concrete weekly targets: 5 job applications + 2 freelance client outreaches per week

Resources:

- How to Get Your First Freelance Web Development Client – Traversy Media (youtube) — <https://www.youtube.com/watch?v=T0kACFnIZ4M>
- How to Get a Remote Job in India – Apna College (youtube) — <https://www.youtube.com/watch?v=j6ZUoSFBMLg>

Practice: Reach out to 3 local Jaunpur businesses (shops, coaching centers, or clinics) offering to build them a simple website for ₹2,000–₹5,000 as your first freelance client
